

# Model 1200

## Model 1200 - Vertical form, fill and seal – with two styles available

The Model 1200 machines are highly reliable, microprocessor controlled, and can cut your packaging costs by up to 70%. Using inexpensive polyethylene or other colaminated roll stock, these systems produce 25-30 bags per minute, depending on the model, package size, and product.

The 1200 will free you from costly inventories of pre-made bags and eliminate single source supply problems. It is available in two styles – Standard Hot Knife cutoff optional or Mechanical cutoff with hot bar seal.

System Packaging assures you outstanding product and service support, prompt delivery, and dependable performance with microprocessor flexibility. Our systems feature heavy-duty construction designed for an industrial environment to provide many years of dependable service.

## SPECIFICATIONS

Model	DIMENSIONS			PACKAGE WIDTH (Adjustable)	PACKAGE LENGTH	STD. ELECTRICAL REQUIREMENT*	STD. AIR REQUIREMENT
	L	D	H				
<b>M-1200-H6</b> with hot knife cutoff	31"	48"	47"	1 1/2" – 6"	Up to 8"	115 volts, 1 phase 60 hz., 15 amps	80 PSIG
<b>M-1200-H10</b> with hot knife cutoff	38"	52"	47"	1 1/2" – 10"	Up to 12"	115 volts, 1 phase 60 hz., 15 amps	80 PSIG

## FEATURES

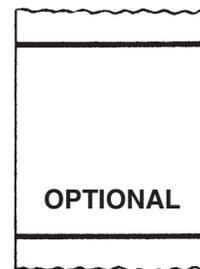

- ▶ Delivers up to 25-30 sealed packages per minute, depending on series
- ▶ Uses either plain or imprinted roll stock
- ▶ Touch screen control system lets operator vary bag length in 1/10" increments throughout the range of the machine
- ▶ Fully automatic operation with adjustable dwell time
- ▶ Load height varies depending on bag width
- ▶ Programmable controller
- ▶ Built in alarm system and cycle counter
- ▶ All moving components supported through linear or radial bearings
- ▶ Internal machine parts are manufactured of Aluminum, UHMW, Nylon or Stainless Steel
- ▶ Easy access of sealing area for preventative maintenance

## OPTIONS\*

- ▶ Electric eye cutoff for registered, printed material
- ▶ Programmable thermal transfer printers
- ▶ Imprinters – codes, dates, part numbers
- ▶ Automatic labeling, and weighing systems
- ▶ Incline exit conveyor and Indexing infeed bucket conveyor
- ▶ Hole punch
- ▶ Casters
- ▶ Automatic vibratory electronic counting equipment
- ▶ Pre-set batch counter for running a specified number of bags with automatic shutoff
- ▶ Volumetric Fillers
